

DATA SHEET

GMC DIMPLEMARK Grass Marking Concentrate Pitch Design

GMC Dimplemark

Description

GMC DIMPLEMARK is a "Ready for Use" water-based paint designed for application to natural grass and shale sports surfaces.

GMC DIMPLEMARK's pigmentation also ensures a highly visible line throughout its service life.

Uses

GMC DIMPLEMARK is used to line mark activity areas on natural grass and shale sports surfaces.

Supplied in 25 litre containers for immediate use, **GMC DIMPLEMARK**'s ready to use formulation means that the paint can be used in situations where access to clean water is restricted.

GMC DIMPLEMARK is ideal for initial line marking and is applied by any suitable transfer-wheel machine (contact our Technical Services Department). In situations where **GMC DIMPLEMARK** is used to over mark, its free-flowing formulation makes for a quick and easy dilution with water.

GMC DIMPLEMARK can also be used as a base to mark different coloured lines.

Application

GMC DIMPLEMARK can be applied by any suitable transfer-wheel machine. Line marking machines can be cleaned with **GMC Powerflush** (see the **GMC Powerflush** Technical Data Sheet).

Application Conditions

GMC DIMPLEMARK should only be applied in fine, dry weather and when these conditions are likely to prevail for 1-2 hours following application.

Recommended Dilution Rates

For initial marking	Use GMC DIMPLEMARK neat
For over marking	1 part GMC DIMPLEMARK to 1 part water

Note: The dilution of the concentrate at the point of application is under the control of the user and may be adjusted to suit the condition of the surface.

Drying Time

Approx. 30 minutes at 20°C.

Note: drying time is dependent on surface dampness, ambient temperature and relative humidity levels. If applied to a damp surface, at temperatures below 20°C or in cool, damp air, drying times will be extended.

Colouration

Using **GMC Colourants** (see the **GMC Colourants** Technical Data Sheet), **GMC DIMPLEMARK** can be used to mark lines in the following colours: red, yellow, blue and green.

Packaging

15 litre containers.

Shelf Life

GMC DIMPLEMARK has a shelf life of approximately 6 months in original, unopened packaging.

Storage

Store above 5°C in an environment safe from frost.

Health & Safety

GMC DIMPLEMARK is a water-based paint, making it relatively safe to use and minimising the risk of environmental impact from its usage. For more detailed information please refer to **GMC DIMPLEMARK**'s current Material Safety Data Sheet.

Further Information

To ensure you are specifying or applying a fit for purpose line paint please contact our Technical Services Department.
