

# Tuf-Cote Line-marking Aerosols

**SPORTS  
COATINGS**  
TECHNOLOGY AT YOUR FEET

## Tuf-Cote Line-marking Aerosols

Utilising highly effective xylene-free solvent-based acrylic technology, **Tuf-Cote** is specially designed to have extra durability over general purpose marking paints such as **Sure-Cote**. Lines are applied more consistently and thickly with **Tuf-Cote**, meaning surface markings will have extra visibility and will withstand higher than normal levels of activity.

Incorporating special pigments to ensure brightness, **Tuf-Cote** lines will remain highly visible for the lifetime of the paint.

**Tuf-Cote** aerosols are designed to be used by hand or in a robust 4-wheel aerosol trolley specially constructed for the purpose. The 4-wheel trolley, available from Sports Coatings, can be set to mark lines at 50mm (2") or 75mm (3") widths and is easily converted to a 2-wheel version.

For a 50mm line and depending on application speed, coverage per can is approximately 100m.

**Tuf-Cote** is available in white and yellow with special colours available on request.

### Special Properties

- ☞ Easy application for precise markings
- ☞ Low odour
- ☞ Fast drying for minimal downtime
- ☞ Consistent application for optimum coverage
- ☞ Thicker lines for extra durability
- ☞ Bright pigmentation for better visibility

### Uses

**Tuf-Cote** is ideal for marking natural grass, synthetic grass and tarmac or cement based hard surfaces.

**Tuf-Cote** should be used for temporary lines on tennis and netball courts, school playgrounds, 5-a-side and full sized football pitches, car parks and other demanding industrial uses.
