## Tuf-Cote Heavy-duty Line-marking Aerosol

**SPORTS  
COATINGS**  
TECHNOLOGY AT YOUR FEET

### Standard Colours

*The colour of the applied coating may differ from the above representation. Contact our Technical Service Department if an accurate sample is required.*

### Description

Utilising highly effective solvent-based acrylic technology, **TUF-COTE** is an aerosol-based paint specially formulated to have superior durability than general purpose marking paints.

Markings are applied more consistently and thickly with **TUF-COTE**, meaning lines have extra visibility and will withstand higher than normal levels of activity. **TUF-COTE**'s formulation also ensures rapid drying.

Incorporating special pigments to ensure optimum brightness, **TUF-COTE** markings will remain highly visible for the lifetime of the paint.

**TUF-COTE**'s xylene-free formulation means the paint has a low odour.

### Uses

**TUF-COTE** is suitable for use on hard and soft surfaces, including natural grass, synthetic grass, tarmac and concrete.

**TUF-COTE** should be used for temporary lines on tennis and netball courts, school playgrounds, five-a-side and full sized football pitches, car parks and other demanding industrial uses.

**TUF-COTE**'s rapid drying formulation is ideal for minimising site downtime.

**TUF-COTE** is available in white and yellow.

### Surface Preparation

To ensure adequate adhesion, surfaces must be clean, dry and free from any loosely adhered material.

### Application

**TUF-COTE** is designed to be applied by hand or by 4-wheel and 2-wheel trolleys (both these trolley types are available from **Sports Coatings**).

### Application Conditions

**TUF-COTE** should only be applied in fine, dry weather and when these conditions are likely to prevail for 1-2 hours following application.

### Drying Time

Approximately 1 hour at 20°C.

**Note: drying time is dependent on ambient temperature and thickness of line applied. If applied at temperatures below 20°C or at a thickness greater than recommended, drying times will be extended.**

### Packaging

750ml cans

### Coverage

100 linear metres/aerosol at a line width of 50mm.

**Note: coverage will vary depending on substrate porosity and evenness, together with application technique used.**

### Shelf Life

**TUF-COTE** has a shelf life of approximately 12 months.

### Storage

Store away from direct sunlight and at a temperature between 5°C and 30°C.

### Health and Safety

**TUF-COTE** is a solvent-based paint and has attendant health and safety implications. For more detailed information please refer to **TUF-COTE**'s current Material Safety Data Sheet.

### Further Information

To ensure you are specifying or applying a fit for purpose aerosol paint, please contact our Technical Services Department.
